Rotary 

Site info & links

Blaafarveværket

The Royal Cobalt Works has a long history and was established as early as 1776. For over 100 years, thousands of people worked to extract cobalt from the deep mines at Modum. This special metal was used to make cobalt blue paint - which in turn was supplied to the entire world's porcelain and glass industry. In fact, between 1773 and 1893, Norwegian cobalt extraction accounted for as much as 80 % of the world's production!

Vikersundbakken

Vikersundbakken or Vikersund Ski jump (<https://vikersund.no/>) is a ski flying hill at

Vikersund in Modum, Norway. It is one of the two largest purpose-built ski flying hills in the world

Nine world records have been set there, including the current record of 253.5 meters, set by Stefan Kraft. The complex consists of a large hill, a normal hill and several training hills.

The hill was opened in 1936 as a large hill.

Vikersundbakken was the first ski flying hill to receive floodlights in 2006. It has hosted the FIS Ski Flying World Championships in 1977, 1990, 2000, 2012 and 2022

Rotary

Hallingdal mountain valley.

Nesbyen is Norway's warmest place , and Trytjetjern is one of Hallingdal's most beautiful places when the sun is shining.

Here you will find a sandy beach, water trampoline, sand volleyball court, outdoor grill, walking and cycling paths, and downhill cycling, gap hut.

In other words, the perfect place for long and hot summer days.

Gol & Ål

Gol is the trading center in Hallingdal. But in summer you have the chance to see farm livestock up close, experience local traditions and rural Norwegian culture in the scenic surroundings of the Golsfjell mountains.

Welcome to Ål in Hallingdal - When nature calls! Situated in the middle of Southern Norway halfway between Oslo and Bergen, you will find the cozy small cultural village

Rotary

Holmenkollen Ski Arena

Holmenkollen is a state-of-the-art arena for cross-country skiing, biathlon and ski jumping, and includes the famous Holmenkollen Ski Jump, Midtstubakken Ski Jump, five smaller recruitment slopes, cross-country skiing trails and a ski stadium.

You will get the thrilling story on how it is to fly on ski by one of the former skijumpers

Oslo City

The capital of Norway - Oslo - sits on the country's southern coast at the head of the Oslofjord.

Oslo is pretty unique with direct access to the sea and summer sports and on the opposite side, the forests and mountains within 20 minutes. Oslo is a hip city with a rich culture life and has a bigger percentage of immigrants and Norwegian-born children with immigrant parents than any other region in Norway.
