years old

Summer Camp 2023 | July 22nd-29th On the Sails of Sustainability

Camp objective is to offer young people a unique learning and cultural experience related to an increasingly relevant topic for Rotary and Society, the **Sustainability**, with focus on the main hot topics and trends: renewable energy sources, recycling, reduce food waste and standardized sustainable materials.

Responsible consumption and production is about doing more and better with less. It is also about decoupling economic growth from environmental degradation, increasing resource efficiency and promoting sustainable lifestyles.

The world's energy and food systems must be transformed to cope with growing demand to become more inclusive, secure and sustainable and to support the development of a sustainable and circular bioeconomy.

Camp's participants will have the opportunity to visit outstanding companies that made sustainability their driver of innovation and growth and seeing it applied to operational processes and aimed at bringing value and pursuing excellence.

Furthermore, you will have the opportunity to experience the highest levels of sustainability applied to sport, in particular sailing as it represents an ideal place for training and experimentation, an environment where it is possible to embrace values and reproduce fundamental dynamics such as sustainable strategies, problem solving, team working and leadership. Learn sailing's contribution to global sustainability aboard **IDRUSA, a dream maxy yacht of 80 feet**, holder of major victories worldwide and that has hosted the most important olympic champions.
